defytime Science Japan Co., Ltd.

defytime Science to deploy the world standard "telomere Total Solution"

Introduction of virtual currency Bitcoin payment service to purchase "TAM series" products

— Purchase will be possible from anywhere in the world with Bitcoin payment service —

defytime Science Japan Inc. (Headquarter: Chuo-ku, Tokyo CEO Takashi Nishihira, hereinafter "defy time") is a company that develops telomere lengthen related products "TAM series" which contains a telomerase gene induced activation substance based on research results of Bill Andrews Ph.D. who is a worldwide authority in aging treatment. We have now introduced the settlement system and started payment service with virtual currency Bitcoin.

【By Introducing This Payment Service】

Our vision is "Creating a society where people around the world can live healthy and live longer", and from the very beginning of development we wanted to deliver the TAM series to people around the world. However, until now it has been a matter of fact that there were times when it was troublesome for overseas customers to handle the payment methods and we were not able to satisfy the customers. Now it is possible for people all over the world to get TAM series by the introduction of payment service with virtual currency Bitcoin, which is spreading in various countries around the world. Of course, there are many other benefits by using Bitcoin such as no need to burden bank transfer fee.

【About Bitcoin Payment Service】

Bitcoin is a virtual currency made to facilitate economic activities, like the JPY and USD operated on a national level. It is now possible to conduct economic activities on online services, and users are increasing worldwide due to very cheap handling fee and free payment methods with this payment service.

【About TAM Series】

The TAM series are aging care products containing "Telomerase Activating Molecule (TAM)", a telomerase-

induced activation substance, which is a research result over 30 years by Dr. Bill Andrews, a global authority on aging treatment.

◆defytime the First

High-class Aging Care Skin Cream

Contents: 7.5 g × 2

Suggested retail price : ¥73,000 (tax included: ¥78,840)

◆defytime TAM Spray

Oral Administration Type Aging Care Supplement

Contents: 20ml × 3

Suggested retail price: ¥76,000 (tax excluded : ¥82,080)

【Establishment date】 November 4th, 2014

【Capital】 JPY 263,610,000 (As of Oct 17, 2017)

■ Bill Andrews Ph.D. Profile

Born in 1951. He holds a Ph.D. in molecular and collective genetics at Georgia University, USA.

He has been active in the biotechnology industry for more than 30 years. For the last 20 years he is a leading researcher studying ways to extend human lifespan by intervention in telomere shortening in human cells.

While working in Geron Corporation he discovered the RNA and protein components of human telomerase and was awarded 2nd place as "National Inventor of the Year" in 1997. He is also a named inventor on over 50+ US issued patents on telomerase. "TAM" stands for "Telomerase Activating Molecule", the latest telomerase enzyme induced activation substance developed by Bill Andrews Ph, D.
